EDUCATION

Washington University in St. Louis, Saint Louis, MO, United State

08/2023 – 05/2025

Master of Computer Science

- Cumulative GPA: 3.71/4.0
- Relevant Coursework with Grades: Introduction to Computer Security (A), Object-Oriented Software Development Laboratory (A), Introduction to Quantum Computing (A), Introduction to Computer Networks (A), Network Security (A-), Masters Project (A)

Macao Polytechnic University (MPU), Macao SAR, China

09/2018 – 06/2022

Bachelor of Science in Computing

- Cumulative GPA: 3.58/4.0, Ranking: Top 2 out of 60 (Approx.)
- Relevant Coursework with Grades: Discrete Mathematics (A-), Statistics I & II (A), Data Structure and Algorithms (A-), Object Oriented Technologies (A), Database Management Systems (A), Information System Implementation (A-), Artificial Intelligence (A)

PROJECT EXPERIENCE

Asynchronous Routing for Multipartite Entanglement in Quantum Networks, *Instructor: Raj Jain*

01/2024 – 06/2024

- Simulated an asynchronous, tree-based routing scheme for multipartite entanglement distribution in quantum networks, with a focus on 3-party Greenberger-Horne-Zeilinger (GHZ) states.
- Achieved significantly higher entanglement rates compared to traditional synchronous methods, especially as coherence times increased, while conserving unused entanglements and removing the need for synchronous operations.
- Contributed to the advancement of quantum networking solutions for applications such as quantum secret sharing and multi-party computation

A Cross-platform Errand Service Application for Campus with a Dual-user Identity Model, *Developer*

10/2021 – 06/2022

- Selected Flutter as the developing framework; used MongoDB as the database to store user data and order data, and interacted with the blockchain to store information about completed orders
- The system connected campus IT accounts and allowed only campus email registration to enhance security; introduced an incentive mechanism to encourage students to provide help to others utilizing fragmented time
- Accepted by *IEEE International Conference on Software Engineering and Service Sciences (ICSESS) 2022* ([Link](#))

A Greenhouse Climate Simulating IoT System, *Developer*, *Instructor: Dr Deng Shujie*

06/2021 – 04/2022

- Selected sensors and actuators, designed the supporting Android App, and 3D printed the corresponding modules
- Established an intelligent system with the function of remote reading and adjusting the indoor environment, which solved the problem of geographical restrictions on plant cultivation
- Won the *1st Prize (11/10000+)* in the Pan-Pearl River Delta Region+ University Student IT FYP Competition 2021, and *3rd Prize* in Challenge Cup National Undergraduate Curricular Academic Science and Technology Contest 2022

An Online Book Shopping Mall, *Group Leader*, *Instructor: Andrew Siu*, COMP321 Project

03/2021 – 11/2021

- Coordinated a group of four students; responsible for front and back-end programming; used PyCharm as the development environment, combined with Python, Django, and Bootstrap to implement an online shopping system
- The consumer side could realize operations including user registration, shopping, order submission, payment, etc.; the seller side could realize product addition, deletion, query, order management, operator management, member management, etc.

An AI Application to Predict the Decibel, *Group Leader*, *Instructor: Dr Silvia Mirri*

10/2020 – 11/2020

- *International Summer School on Smart Object Application* at Università di Bologna
- Developed an AI application to predict sound meter level decibel values from a low-end microphone exploiting the environmental data provided by a Canarin II sensor; visualized the data via a web application

WORK EXPERIENCE

Washington University McKelvey School of Engineering, *Teaching Assistant*, Saint Louis, United States

01/2024 – Present

- Assisted in undergraduate courses, including Introduction to Artificial Intelligence and Computer Architecture
- Held weekly office hours to provide academic support, answer questions, and clarify course material for students

BluPurple Design & Interactive Media Ltd., *Full Stack Software Engineer Intern*, Macao SAR, China

10/2021 – 11/2021

- Designed a series of user interfaces to show the functionality of the project and the navigation logic between pages
- Built a cross-end application for Android and iOS based on Flutter divided into a merchant side and a user side
- Allowed sellers to create and manage multiple online stores and buyers to browse products and place orders

LEADERSHIP EXPERIENCE

MPU Souma Drama Club, *Minister of General Affairs*, Macao SAR, China

09/2018 – 06/2022

- Designed costumes, props, and stage decoration; controlled the lighting and sound effects during performances; wrote and reviewed drama scripts; organized rehearsals for actors

SKILLS AND MEMBERSHIP

- *Computer Skills*: Java, Python, C++, Dart, MySQL, MongoDB, HTML, CSS, JavaScript, Flutter, Django, Latex
- *Language Skills*: English (Working Proficient), Mandarin (Native), Cantonese (Working Proficient),
- *Membership*: Institution of Engineering and Technology (IET), IEEE Graduate Student Member
